

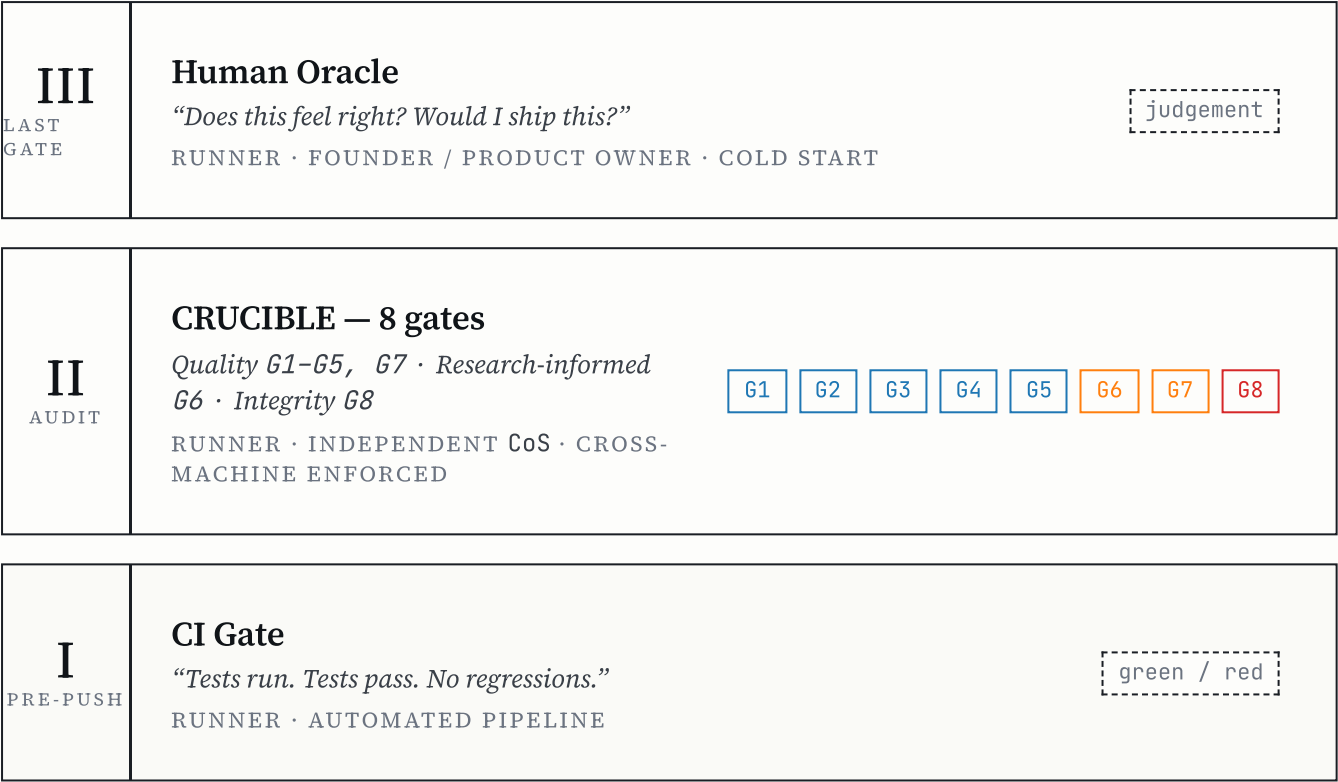

FIGURE 1 — THE QUALITY STACK

■ Controls Gates 1–5 — preventive & detective.      ■ Substantive Gates 6–7 — mutation & spec-traceability.      ■ Forensic Gate 8 — audits the measurement system itself.

FIGURE 1. The Quality Stack — three independent oracle layers. A green CI gate (Layer I) does not imply clean CRUCIBLE (Layer II); clean CRUCIBLE does not imply a Human Oracle pass (Layer III). All three are required. Colours encode the audit-theory taxonomy of *Boynton et al.* [BOYNTON-2002] carried through the remaining figures.
